Installation example :

NOTE!

Model ADP-32B supports all MXN camera models without motorized shutter and also all MXN camera models with motorized shutter.

WARNING!

Model ADP-32B is compatible with above monitor models, regardless these monitors are powered by +12V or +24V.

But model ADP-32B itself is not compatible with +24V DC.

In order to avoid defects or damage, please use model ADP-32B strictly with the recommended monitors only.
